Who is this eBook for?

This eBook is for all Company Directors/owners, and/or their management/support teams, who have responsibility for their organisation's Irish company law compliance obligations.

The intended purpose of this eBook is to encompass in one area everything a small private business operating as a limited liability company needs to think about to ensure their company remains company law compliant.

Whilst it is not intended that this eBook is a 'company secretarial encyclopaedia', it does aim to bring the expertise gained by FCS Services over the years to small businesses in a user-friendly informative format. It should, also, guide users to put in place a framework specific to each of their individual needs.
